AI ENGINEER · VALENCIA, SPAIN

Jaume Cortés.

I turn client needs into AI agents and the software around them, end to end.

EXPERIENCE

2023 – PRESENT

AI Engineer

CodeGenia

- AI agents for Elecnor on Google Cloud Vertex AI, working with their teams in the United States and Spain.
- Conversational agents automating business workflows and surfacing insights from internal data.
- Integrations wiring AI models into existing products, removing manual steps.

2022

Software Developer

Dare Planet Technology

- Bosch technical repair service mobile app, unifying the service workflow for field technicians.
- Full-stack features across web and cross-platform client projects.

2020

Software Developer

ITACA-SABIEN

- Company web application end to end: database, backend, and interface.

PROJECTS

2026

Elecnor

Global AI agent platform deployed in the United States and Spain to automate business workflows.

2025 – PRESENT

Vestor

Portfolio tracking and financial planning platform. API consumption and web scraping.

2023

Scalextric

Real-time object detection on a physical race track, mirrored live by a 3D rendering in the browser.

ABOUT ME

Currently translating client needs into tailored technical solutions: conversational and task-based agents on Google Cloud Vertex AI, integrations between APIs and models, and the end-to-end software around them, from architecture to the frontend in React, Vue.js, Node.js, and other technologies.

EDUCATION

2026

Degree in Computer Engineering

Universidad Int. Valencia (VIU)

2023

Cross-Platform Application Development

IES La Sènia

2020

Web Application Development

Grupo Studio Formación
